Eric -

From the TCT discussion yesterday, I got the impression that the LWG is concerned about the effort to run Teresa's floating percentile method model. On the way back to the office, we talked about having the LWG use Mike Anderson's refined spreadsheet. Jim Anderson and Keith Johnson think this would be fine. If you agree, I can email Teresa or check with her at our RSET meeting on Monday. Giving the LWG a more efficient and user-friendly model could speed up their evaluations and help the schedule.

- Mike
